Profile

Results-oriented .NET Full Stack Developer with 3+ years of experience building scalable enterprise web applications, REST APIs, and database-driven solutions using C#, .NET Core, Angular, and SQL Server. Experienced in end-to-end development, performance optimization, reusable module design, and client collaboration, with additional hands-on expertise in Python-based computer vision and automation systems.

Work Experience

Hard Shell Technologies, Noida *06/2023 – Present*

Software Engineer *05/2026 – Present*

- Developing scalable enterprise web applications using .NET Core, Angular, SQL Server, and REST APIs.
- Designing reusable backend modules and improving application performance.
- Collaborating with clients and cross-functional teams to deliver business solutions.

Junior Software Engineer *05/2025 – 04/2026*

- Developed large-scale modules and REST APIs using .NET Core and Angular.
- Mentored trainees, reviewed code, and followed development best practices.
- Maintained technical documentation for knowledge transfer.

Junior Associate *04/2024 – 04/2025*

- Led the THR project end-to-end while interacting directly with clients.
- Built approval workflows and REST APIs to reduce delays and improve efficiency.
- Created reusable modules used across SMU, eSTEM, GT_CSR, Hortnet, and NBB.

Software Engineer Trainee *06/2023 – 03/2024*

- Developed web applications using .NET MVC, jQuery, and SQL Server.
- Built APIs for mobile-web integration.
- Optimized SQL queries and code to improve load time and performance.

Vcare Techs, Delhi *03/2023 – 06/2023*

Frontend Developer Intern

- Enhanced interactive UI using HTML, CSS, Bootstrap, and JavaScript.
- Performed debugging, testing, and deployment support.

Skills

Programming Languages: C#, Python, JavaScript, TypeScript

Frameworks & Technologies: ADO.NET, .NET Core API, .NET Core MVC, Angular, RESTful APIs, API Integration, Bootstrap, HTML, CSS, jQuery

Databases: SQL Server, MySQL, Database Optimization

Tools & Platforms: Git, GitHub Actions (CI/CD), SVN, DBeaver, SSMS, Visual Studio, VS Code, Postman

Additional Skills: Prompt Engineering, Performance Optimization, Computer Vision, YOLO, Easy-OCR

Projects

Take Home Ration (THR)

- Managed modules for ration distribution system for Anganwadi beneficiaries.
- Developed APIs to connect web and mobile teams.

State Management Unit (SMU)

- Developed approval-based workflows for a government skill development project.
- Built reporting modules based on client requirements.

eSTEM

- Migrated project from Entity Framework to MVC for performance improvement.
- Enhanced frontend using Angular and dynamic reporting.

GT_CSR

- Developed APIs enabling real-time dynamic data for Angular frontend.
- Improved backend–frontend communication.

GT_NBB

- Developed custom modules, dynamic reports, and dashboard features to improve data management and visualization across the platform.
- Built and enhanced the CMS to enable faster content updates and easier administration for internal teams.
- Resolved security vulnerabilities identified during post-deployment audit reviews by implementing fixes and strengthening application security, improving overall system reliability and compliance.

HRMS

- Developed HR modules including Company, Workplace, and Employee Registration.
- Added bulk upload functionality to reduce manual data entry.

AI Face Attendance & Vehicle Number Plate Detection System

- Developed a real-time smart surveillance system using Python for face attendance tracking and vehicle number plate detection using CCTV/RTSP camera feeds.
- Built and optimized face recognition and number plate detection pipelines using Buffalo model, YOLO, and EasyOCR, including model training, dataset preparation, and image preprocessing.
- Integrated the system with MySQL for attendance and vehicle record storage, with CPU-focused performance optimization to run efficiently without GPU dependency.

Key Achievements

- **Automated Email Reporting:** Built a C# Windows Service to automate daily email generation from SQL Server, reducing manual effort, improving reporting accuracy, and streamlining business communication workflows.
- **Security Compliance Improvement:** Resolved multiple security vulnerabilities identified during post-deployment audit reviews by implementing secure code fixes and application-level improvements, enhancing overall system reliability and compliance.

Certifications

Oracle Fusion AI Agent Studio Certified Foundations Associate	09/2025
Oracle Cloud Infrastructure 2025 Certified Foundations Associate	08/2025 – 08/2027

Education

Raja Mahendra Pratap University, Aligarh	08/2021 – 07/2024
B.Sc. (PCM)	
Board of Technical Education, U.P.	08/2018 – 08/2021
Diploma in Electrical Engineering
